

## THE JOURNAL OF HORTICULTURAL SCIENCE, VOL 55, 1980

## SUBJECT INDEX

- Abscission, fruit, growth regulators, 207  
*Alnus incana*, nursery stock, chemical defoliation, 119  
*Alternaria* sp., 363  
 Apple, blossom, potential, estimation, 145  
     bud forcing, blossom estimation, 145  
     clonal variation, vigour, 439  
     cultivars, Bramley's Seedling, 359  
         Cox's orange Pippin, 27, 145, 149, 157, 199, 259, 267, 275, 279, 307, 313, 439  
         Crab C, 279  
         Delicious, 127  
         Discovery, 437  
         Golden Delicious, 113  
         James Grieve, 313  
         Laxton's Fortune, 259  
     disorders, bitter pit, control, 313  
         bitter pit, nutrition, 57  
         bitter pit, prediction, 307  
         replant disease, 259  
     evaporative cooling, frost protection, 157  
     flowering, previous year's harvest affects, 359  
     frost protection, model, 157  
     fruit, development, growth stresses, 27  
         setting, growth regulators, 275  
         set, previous year's harvest affects, 359  
         thinning, mechanical, 127  
         thinning, methods, 267  
         thinning, timing, 127  
         uptake, distribution, K, Ca, Mg, 57  
     growing in England, yield variation, 149  
     growth stresses, fruit development, 27  
     growth regulators, uptake, distribution, persistence, 199  
     growth relations, rootstock: scion, 181  
     latent virus, vigour, 439  
     leaf size, shoot length, relations, 279  
     nutrition, bitter pit, 57  
         calcium, uptake, distribution, 57  
         magnesium, uptake, distribution, 57  
         potassium, uptake, distribution, 57  
     picking date, following years' crop, 359  
     pruning, leaf size, shoot length, relations, 279  
     rootstock propagation, cuttings, 171  
     rootstock: scion, growth relations, 181  
     russetting, dimethoate spray, 113  
     shoot length, leaf size, relations, 279  
     soil fumigation, replant disease, 259  
     temperature, early-season, growth, branching, 437  
     vigour, clonal variation and latent virus affect, 439  
     yield, annual variation, 149  
     young tree, branching, early-season temperature, 437  
         growth, early-season temperature, 437  
  
 Beetroot, keeping quality, lifting and storage, 409  
     lifting date, keeping quality, 409  
     storage temperature, keeping quality, 409  
*Betula pendula*, nursery stock, chemical defoliation, 119

- Biochemical markers, olive cultivars, 333
- Black currant, pests, *Cecidophyopsis ribis*, 1
- Botrytis cinerea*, 363
  - new raspberry cultivars, 133
- Calabrese, seedling emergence, soil compaction, 325
- Carnation, glasshouse, production, quality, 89
  - nutrition, minor elements, lime, 89
- Carpinus pendula*, nursery stock, chemical defoliation, 119
- Cauliflower, propagation, root shoots, 65
  - seedling establishment, moisture, 229
  - shoots from roots, variation, 65
  - transplantation, water relations, 229
- Cecidophyopsis ribis*, host range, 1
  - non-gall-forming strain, 1
- Ceratonia siliqua*, leaf, surface wax, 85
- Cherry, disorders, surface pitting, 375
  - fruit, chemical treatments, surface pitting, 375
    - handling, surface pitting, 375
    - storage, surface pitting, 375
- Chestnut, *in vitro* propagation, buds, 83
- Chrysanthemum, flowering, growth regulators, 239
  - growth, growth regulators, 239
- Citrus, seed germination, emergence, temperature, 291
- Cladosporium* sp., 363
- Cotoneaster*, drought adaptation, 219
  - water relations, 219
- Cultivar, chemical identification, olive, 333
- Defoliation, chemical, tree nursery stock, 119
- Didymella applanata*, new raspberry cultivars, 133
- Diseases, virus, transmission, properties, pawpaw, 191
- Drought, adaptation, *Cotoneaster*, 219
  - resistance, leaf surface wax, 85
- Dwarfing, strains, inoculations, orange, 49
- Editorial Note, 323
- Emergence, seedling, soil compaction, 325
  - seedling, temperature, 291
- Frost protection, evaporative cooling, apple, 157
- Fruit, growth, vascular bundle development, 385
  - rot, raspberry cultivars, 363
  - set, apple, growth regulators, 275
  - trees, virus infection, ornamental Rosaceae, 103
- Fungi, fruit rotting, raspberry cultivars, 363
- Germination, seed ripeness, treatment, 285
  - seed, temperature, 291
- Ghana, shallot growing, 139
- Gooseberry, pests, *Cecidophyopsis ribis*, 1
- Grapefruit, fruit drop control, growth regulators, 211
  - harvest duration, growth regulators, 211
- Growth regulators, abscission, lemon fruit, 207
  - apple fruit thinning, 267
  - cropping, fruit quality, pear, 33
  - flower, fruitlet, thinning, 19
  - fruit, drop control, grapefruit, 211
    - set, apple, 275
  - growth, flowering, chrysanthemum, 239
  - harvest duration, grapefruit, 211
  - propagation, chestnut buds, 83
  - radish, shoot, root, growth, 253
  - uptake, distribution, persistence, apple, 199
  - yield, leaf, flower characters, tomato, 41
  - compounds, AMO 1618, 253
    - BAP, 83
    - 3-CPP amide, 19

- 2,4-D, 41, 211
- daminozide, 199, 253
- dikegulac, 207
- ethephon, 19, 207, 267
- GA, 33, 83, 211
- kinetin, 83
- M&B 25105, 19
- NAA, 19
- PP 341 B, 275
- RH 531, 253
- UB1-P293, 239
- zeatin, 83
- Growth retardants, radish, growth, 253
- Guava, leaf composition, India, 433
  - nutritional status, India, 433
- Hop, composition, alpha-acid, weather, 71
  - weather, alpha-acid content, 71
- Insecticides, apple fruit thinning, 267
  - compounds, carbaryl, 267
    - dimethoate, apple russetting, 113
- Isozyme banding patterns, cultivar identification, 333
- Japanes pear, fruit, development, anatomy, 385
  - vascular bundle development, fruit, 385
- Jojoba, propagation, tissue culture, 299
- Leaf, surface wax, drought resistance, 85
  - surface wax, soil moisture status, 85
- Lemon, fruit, abscissants tested, 207
- Light-dependent control, temperature, tomato, 7
- Lime, minor elements, carnation, performance, 89
- Minor elements, lime, carnation, performance, 89
- Multivariate analysis, fruiting structure, raspberry, 397
- Nitrogen, greenhouse tomato, Cyprus, 415
- Olive, cultivars, chemical identification, 333
  - leaf, surface wax, 85
  - pollen, isozyme banding patterns, 333
- Onion, bolting, spacing, winter, 97
  - overwintered, spacing, bolting, 97
    - spacing, yield, 97
  - plant density, yield, 247
  - planting rectangularity, yield, 247
  - seed weight, yield, 247
  - seedling emergence, soil compaction, 325
  - spacing, yield, bolting, 97
    - yield, uniformity, 235
  - uniformity, spacing pattern, 235
  - yield, seed weight, rectangularity, density, 247
    - spacing pattern, 235
- Orange, cultivars, Valencia, 49
  - dwarfing, inoculations, 49
- Ornamental Rosaceae, virus infection, fruit trees, 103
- Passiflora edulis* f. *edulis*, see passion fruit
- Passion fruit, growing in Kenya, 345, 351
  - pruning, disease incidence, 351
    - fruit quality, 351
      - yield, 345
  - trellising, fruit quality, 351
    - disease incidence, 351
      - yield, 345
- Pawpaw, diseases, virus, Nigeria, 191

- Pear, cropping, GA, thinning, 33  
 cultivars, Beurré Bosc, 127  
 Conference, 33  
 Josephine, 127  
 Packham's Triumph, 127  
 Williams', 127  
 fruit, quality, GA, thinning, 33  
 thinning, mechanical, 127  
 thinning, timing, 127  
 growth regulators, cropping, fruit quality, 33  
 mechanical thinning, cultivar response, 127  
 rootstock, propagation, cuttings, 171  
 thinning, cropping fruit quality, 33
- Phosphorus, greenhouse tomato, Cyprus, 415  
 Photoperiodism, night temperature, poinsettia, 45  
*Pistacia lentiscus*, leaf, surface wax, 85  
 Planting, density, rectangularity, yield, onion, 247  
*Platanus*  $\times$  *hispanica*, nursery stock, chemical defoliation, 119  
 Plum, cultivars, Victoria, 19  
 flower, thinning, 19  
 fruitlet, thinning, 19  
 rootstock, Pixy, 425  
 propagation, cuttings, 171  
 Poinsettia, photoperiodism, night temperature, 45  
 temperature, night, 45  
 Polyvinyl resins, seed coating, 371  
*Poncirus trifoliata*, see trifoliolate orange  
 Potassium, greenhouse tomato, Cyprus, 415  
 Propagation, cuttings, rooting, disbudding, 171  
 cuttings, rooting, moisture relations, 171  
 rooting, wounding, 171  
*in vitro*, chestnut buds, 83  
 rose, rootstocks, 15  
 tissue culture, cauliflower, 65  
 jojoba, 299  
 wax currant, 355  
 Pruning, passion fruit, yield, fruit quality, disease, 345, 351  
*Pseudomonas tumefaciens*, new raspberry cultivars, 133  
*Pryus serotina*, see Japanese pear
- Radish, growth retardants effects, 253  
 growth, shoots, roots, retardants, 253
- Raspberry, agronomic character, new cultivars, 133  
 berry ripeness, estimation, 165  
 harvesting efficiency, 165  
 cultivars, fruit rotting fungi, 363  
 Glen Clova, 133  
 malling Delight, 133  
 Malling Jewel, 133  
 Malling Orion, 133  
 1318/27, 133  
 disease, *Botrytis cinerea*, 363  
 susceptibility, new cultivars, 133  
 fruiting structure, multivariate analysis, 397  
 harvesting, mechanical, efficiency, 165  
 lateral characteristics, multivariate analysis, 397  
 new cultivars, field performance, 133  
 yield, new cultivars, 133
- Red currant, pests, *Cecidophyopsis ribis*, 1  
*Ribes inebrians*, see wax currant  
*Ribes* spp., pests, *Cecidophyopsis ribis*, 1  
 Rootstocks, propagation, apple, pear, plum, 171  
 plum, Pixy, 425  
 Rootstock: scion, growth relations, apple, 181  
 Rosaceae, ornamentals, virus diseases, fruit trees, 103  
 Rose, budding, rootstock 15  
 rootstock, Nigeria, 15

- Russeting, apple, dimethoate spray, 113
- Seed, coating, polyvinyl resins, 371
  - ripeness, germination, trifoliate orange, 285
  - storage, treatment, germination, trifoliate orange, 285
- Shallot, bulb cutting, growth, yield, 139
  - bulb size, growth, yield, 139
  - growing in Ghana, 139
  - growth, yield, bulb size, cutting, 139
- Simmondsia chinensis*, see jojoba
- Soil, compaction, depth, seedling emergence, 325
  - fumigation, apple replant disease, 259
  - moisture, leaf surface wax, 85
  - temperature, seedling emergence, calabrese, 325
  - seedling emergence, onion, 325
- Spacing pattern, yield, uniformity, onion, 235
- Sphaerotheca macularis*, new raspberry cultivars, 133
- Strawberry, cultivars, Cambridge Prizewinner, 79
  - diseases, latent virus A, 79
  - performance, latent virus A, 79
  - virus-free clone, performance, 79
- Temperature, control, light-dependent, 7
  - seed germination, emergence, 291
  - night, poinsettia, 45
- Thinning, apple fruit, methods compared, 267
  - mechanical, apple, pear, 127
  - timing, 127
- Tissue culture, jojoba, 299
  - wax currant, 355
- Tomato, flower, characters, 2,4-D, 41
  - fruit yield, 2,4-D, 41
  - greenhouse, growing in Cyprus, 415
    - nutrition, 415
  - leaf, area, 2,4-D, 41
  - seed, germination, emergence, temperature, 291
  - temperature, control, 7
  - yield, temperature control, 7
- Transpiration, stress, recovery, 219
- Transplantation, water relations, cauliflower, 229
- Trellising, passion fruit, yield, fruit quality, disease, 345, 351
- Trifoliate orange, germination, seed treatment, 285
  - seed ripeness, storage, germination, 285
- Vascular bundle, development, Japanese pear fruit, 385
- Vegetables, seed coating, polyvinyl resins, 371
- Virus diseases, pawpaw, Nigeria, 191
  - fruit trees, ornamental Rosaceae, 103
- Viruses, transmission, properties, pawpaw, 191
- Weather, hop alpha-acid content, 71
- Water relations, transplantation, cauliflower, 229
- Wax currant, propagation, tissue culture, 355
